Pic 2 : Appreciation for thousands of hours of hard, academical work in classical composition at butt-culture capitalism

Hope that I won't develop a depression and/or psychological disease today in leaving these "wonderful" places, sold to people as "social" 😂😂 -media

A big thank to the hard working [Mozilla Team](#) - I ♥ your SPAM filters

Ooh "Truth" social blocked my new created user immediately after posting post below including [truth](#) with [evidence](#)

Conclusion:

Noteworthy is especially the fact, that usually listeners of innovation in classical music are due to the complexity of the music often the [top educated people of mankind](#). 90.000 (Pic 2 above) of classical music listeners have according to research more impact in society than 90.000 of shit out of buttoholes fans which are mostly located at intellectual Hilly Billy class...here you can see how [perverted](#) and sick this "social" media system really is and who there gets the capitalist "reward"... Many of you without knowing yet pay even this system in publishing advertisements at these Big Tech platforms. Maybe you should start your own [studies](#) and finally overthink your engagement there...
